Dear Oyster Bay Boating Community: Alzheimer's Disease affects over five million people in the United States and over 50,000 people on Long Island.

While it usually affects older individuals, it is now starting to target people in their mid- life. People with mortgages, jobs and kids in colleges.

At this time science and the medical profession has been unable to identify its causes or provide a treatment that will cure this deadly disease or slow down its progression. The impact on families effected by this disease, financially and emotionally are unimaginable.

Alzheimer's Disease Resource Center, a 501C nonprofit based in Bayshore Long Island has been helping families on Long Island deal with the effects of this disease for over thirty-five years. Their services include counseling, legal representation, guidance, referral services and moral support. OBMC has joined together with this group to help provide the financial support they need to carry on their services.

We are going to be selling chances that will be available for purchase at our office for fifty dollars apiece. The purchase of these chances will enroll the holder in a drawing that will be held at the end of the boating season and the winner will be the recipient of a \$1,500 reduction in winter storage fees for the 2019 storage season. You will also receive a commemorative flag with your chance purchase to show your support in the fight against this disease. Hold on to your chance receipt because each chance holder will be entitled to a free craft beer provided by Oyster Bay Brewing Company at the end of season drawing that will be held on the patio at OBMC on September 8th 2018. Chance holders need not be present to win. We ask that all chance purchases be made

by check made out to ADRC. All chance purchases are tax deductible and all monies received will go to ADRC.

Thanking all of you in advance for your support of this worthy cause. BOATING TO SINK ALZHEIMER'S

**Alzheimer's Disease Resource Center Inc. Mission Statement**

To support research that may lead to a cure for Alzheimer's Disease, to provide care, support and education programs for families in need, and to be the voice for families who are coping with Alzheimer's Disease and/or other Dementias.
